

In the Claims:

Please cancel claims 29-32, without prejudice, and amend claim 28 as follows:

1-27. (Canceled)

28. (Currently Amended) A reflection-type liquid crystal display device comprising:

a light guide plate having a polarizing element stuck or adhered thereto on the side facing a reflection-type liquid crystal display panel, the polarizing element maintaining a predetermined air gap relative to the reflection-type liquid crystal display panel;

a source of light arranged on an end surface side of the light guide plate;  
and

a light-diffusing function imparted to the surface of the reflection-type liquid crystal display panel on the side facing the light guide plate,

wherein the reflection-type liquid crystal display panel has a rough surface on the side facing the light guide plate, and a haze (H) defined as an index represented by a ratio of a diffusion transmission factor ( $T_d$ ) and a total light ray transmission factor ( $T_t$ ) is given by:

$$\underline{H[\%] = (T_d/T_t) \times 100,}$$

the haze being less than 50%.
